Evaluate each.

1)
$$\arcsin\left(-\frac{\sqrt{3}}{2}\right)$$

- $A = -\frac{\pi}{3}$ $B = -\frac{\pi}{6}$

- 2) arccot(1)
- $A \qquad -\frac{\pi}{4} \qquad \qquad B \quad 0$

D $\frac{3\pi}{4}$

3)
$$\operatorname{arccsc}\left(\frac{-2\sqrt{3}}{3}\right)$$

- $A \quad -\frac{\pi}{3} \qquad \qquad B \quad -\frac{\pi}{6}$
- $c \frac{2\pi}{3}$
- D $\frac{5\pi}{6}$

4)
$$\cos\left(\arcsin\left(-\frac{1}{2}\right)\right)$$

 $C \frac{2\pi}{3}$

5)
$$\operatorname{arcsec}\left(\operatorname{sec}\left(\frac{\pi}{3}\right)\right)$$

- $A \qquad -\frac{\pi}{3} \qquad \qquad B \quad \frac{\pi}{3}$

 $\frac{2\pi}{3}$

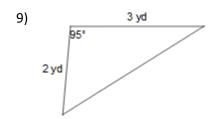

6)
$$\arccos\left(\cos\left(\frac{5\pi}{4}\right)\right)$$

- $C \frac{\pi}{4}$

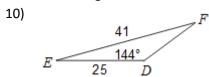

Find the area of each triangle. Round to the nearest tenth.

7)
$$m \angle A = 71^{\circ}, c = 28, b = 11$$

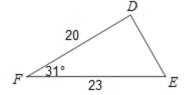

8)
$$m \angle C = 27^{\circ}, b = 22, a = 31$$

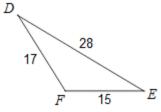

Solve each triangle. Round to the nearest tenth.

11)

12)

13)

14) In
$$\triangle STR$$
, $m \angle R = 78^{\circ}$, $r = 29$, $t = 24$

15) In
$$\triangle ABC$$
, $m \angle A = 54^{\circ}$, $c = 26$, $b = 21$

16)	Alliya is taking a walk along a straight road. She decides to leave the road, so she walks on a path that makes an angle of 35° with the road. After walking for 450 meters, she turns 75° and starts heading back towards the road.
	a. How far does Alliya have to walk get back to the road?
	b. When Alliya returns to the road, how far is she from where she started?
17)	In order to demonstrate that math teachers can also be athletic, Mr. Wytiaz agrees to compete in a triathlon. Not being in the best physical condition, he plans to substitute professional athletes in his place on the race. He constructs masks and suits in order to disguise his impersonators.
	Mr. Wytiaz gets Michael Phelps to swim for him in exchange for performing the math research necessary to develop a surgical procedure to make the webbing of his hands, webbing of his feet, and gills less visible. Lance Armstrong agrees to cycle in exchange for a formula that will mask the presence of certain pharmaceuticals. Lastly, OHS track Coach Jacobs offers to run if it means students being excused for track meets without hassle for the rest of his life.
	From the starting point, racers will swim 5 miles, turn 130° , and bike for 30 miles. As the starting point will also be the ending point of the race, the contestants will then run directly back to the starting point.
	How long, to the nearest tenth of a mile, will Coach Jacobs run?
